

FOR IMMEDIATE RELEASE

Minerva Surgical Launches *HERizon*™ Hysto-Kit, a Hysteroscopy Convenience Kit to Streamline Office-Based Procedures

New solution simplifies in-office hysteroscopy setup and enhances efficiency for OB/GYNs and care teams

Santa Clara, CA — May 27, 2025 — Minerva Surgical, a leader in minimally invasive gynecologic technologies, today announced the launch of the *HERizon Hysto-Kit*, a single-use, pre-assembled kit designed to simplify office-based hysteroscopy procedures. The *HERizon* kit is designed to help Ob/Gyn physicians, and their clinical staff save time, reduce setup complexity and maintain procedural consistency in the outpatient setting.

With the growing shift of gynecologic procedures from the operating room to the office, the new *HERizon* kit supports providers in delivering high-quality, patient-centered care without the logistical burdens of traditional setup. Each sterile *HERizon* kit includes essential procedural components—such as irrigation tubing, suction tubing, drape with fluid collection pouch, and other ancillary supplies—potentially reducing the need to source, sterilize, or prepare individual items for each procedure.

“The *HERizon* Hysto-Kit is a practical extension to our portfolio, designed to support the growing demand for in-office hysteroscopy,” said Darin Hammers, Chief Executive Officer at Minerva Surgical. “By bundling essential single-use supplies into one streamlined kit, we’re helping to simplify setup and support procedural consistency for clinicians and their teams.”

The *HERizon* kit is designed to be used alongside our disposable electronic hysteroscope and *HERizon* single use instrument accessories. In addition, the kit can also be used to aid physicians in performing a range of diagnostic and therapeutic procedures, including the evaluation and treatment of abnormal uterine bleeding.

Key benefits of the *HERizon Hysto-Kit* include:

- **Optimized workflow** with fewer steps and faster room turnover
- **Standardized supplies** to support procedural consistency
- **Cost-efficiency** through reduced inventory management and waste

The *HERizon* Hysto-Kit is now available to order nationwide. For more information visit minervasurgical.com or contact Minerva Surgical Customer Service at 855.646.7874.

About Minerva Surgical, Inc.

Minerva Surgical is a medical technology company dedicated to advancing women's health through innovative, minimally invasive solutions. The company designs, manufactures, distributes, and commercializes a suite of products that may offer effective alternatives to hysterectomy, with a focus on diagnosing and treating the underlying causes of Abnormal Uterine Bleeding (AUB). Minerva Surgical solutions are designed for use across a variety of care settings and aim to improve clinical outcomes, preserve uterine anatomy, and reduce the physical and emotional burdens often associated with more invasive procedures. By empowering physicians with safe, efficient options, Minerva Surgical is helping to reshape the standard of care in gynecology.
